

**Anyone  
can treat  
diabetes.**

**We want to cure it.**

Research teams at ECU are closing in on a possible cure for diabetes. With it would come new hope for thousands, many of them living right here in eastern North Carolina, now facing the chronic burdens of this disease.

We're setting the pace for research at ECU Physicians. Whether it's diabetes, heart disease, or old-fashioned prevention, we're working on solutions for tomorrow that mean better treatments today.

Finding answers that save lives. **That's smart medicine.**
